

Models of Teaching Worksheet

Goal:

This is an exploratory workshop. As a large group, we will answer the 4th question to see if/how models of teaching can be employed in faculty development.

Objective:

1. Discuss your chosen model of teaching with your group members, and answer the questions on this page. Use concise bullets for your answers. Use the back of the page if necessary.
2. Transfer the first three questions with answers to the flipchart page.
3. Keep the last bullet item to yourself until everyone has reported their findings for the first three questions. We will report and discuss the last item as a group.
4. Return this page to workshop leader.

Teaching model for this group: _____

1. How do you use this model in a teaching/learning environment?
2. What makes this model successful?
3. When does/has this model failed? Why?
4. Where do these models fit into faculty development? (How can these models be used in faculty development?) (Do not put the answers for this question on the flipchart yet. Keep your answers to this question among yourselves until the end of the workshop.)
